# SACHIN KUMAR

Ludhiana, Punjab 141010

+91 8146354999 sachin25300@gmail.com

## Experience

**ERP Support** **July 2026 - Present**

*Dainik Jagran*

- Provided technical support for a newly launched application, handling database operations, REST API integration, data validation, software troubleshooting.
- Performed application testing, bug fixing, and collaborated with developers on API and microservices-related issues to ensure smooth deployments and reliability.
- Managed database records, user access, role-based permissions, and backend configurations while maintaining 100% data accuracy across operational records and assisting 100+ users with system operations.

## Internship

### Software Developer

*HHP Software Private Limited*

- Led the enhancement of software testing methodologies, resulting in a 15% increase in overall testing efficiency. This improvement ensured faster deployment cycles and higher-quality deliverables across web and mobile.
- Identified and documented bugs and glitches in various projects, significantly improving the user experience and reliability of client-facing digital solutions.

### Data Analyst

*Kumar Fabricators*

- Developed interactive dashboards for real-time monitoring.
  Designed predictive models to estimate project timelines, improving accuracy in client deliverables by 20%
- Leveraged big data analytics & data visualization to uncover insights, driving a 15% improvement in operational efficiency and reducing costs by 10%

## Projects

**PMS Tracker** | Python, Flask, SQLAlchemy, Celery

- Integrated advanced authentication protocols with Flask-Login ensuring a 100% secure user data management system
- Executed end-to-end project development processes that identified and resolved key bottlenecks in workflows, resulting in a streamlined approach that increased overall productivity by 25% over six months

**Fake Logo Detector** | *Python, R Programming*

- Designed and deployed a highly accurate logo detection model using TensorFlow, achieving a 92% detection accuracy
- Leveraged R for advanced regression modeling to refine detection capabilities, improving precision by 20%

## Certificates

**Computer Graphics and Visualization University of Tokyo** (Mastered key concepts in 3D rendering) **November 2024**

**DAG Authoring for Apache Airflow 3** (Workflow orchestration and DAG dev using Apache Airflow) **February 2026**

**The Complete Theory of Computation** (Deepened understanding of automata theory) **September 2023**

**Data Structures and Algorithms** (Amazon Junior Software Developer Professional) **December 2022**

## Technical Skills

**Languages:** *Java, JavaScript, Python, R, SQL*

**Technologies/Frameworks**: *HTML and CSS, Bootstrap, Excel, Hadoop, Selenium, Oracle*

**Skills**: Data *Structures and Algorithms, Testing, Problem-Solving, Responsive Web Design, Scripting in Python & Tableau*

## Education

**Lovely Professional University Punjab** **2021 – 2025**

*Computer Science and Engineering — CGPA: 7.4* *Phagwara, Punjab*
